

Excellence and quality for all.

330 Series 24.0" Desktop Monitor

There's always room in the budget for quality. The Samsung 24" 330 Series monitor is proof of that. A commercial-level Full HD 1920 x 1080 panel with fast 1ms GTG response time and HDMI/VGA connectivity makes it ideal for whatever the workday brings, from standard office use to video and motion graphics. Eco-friendly features save energy, and thoughtful features include a tilt stand that doesn't block the monitor's mounting holes, making it easy to mount a mini PC or thin client. It's a monitor that's ready to work. It's the Samsung 24" 330 Series monitor.

Key Features

Impressive Picture Quality

The Full HD 1920 x 1080 LED low-glare TN panel delivers sharp, bright, beautiful images. Mega infinity dynamic contrast ratio ensures subtle detail even in the lights and darks, and MagicAngle technology delivers improved color even when viewed from off-angles.

← Sleek Design

The 330 Series monitor looks impressive even when it's off. The slim panel is just 2.1" thin, and the gloss black cabinet brings style to any desk.

Easy Connectivity

Connect to high-speed devices with HDMI, or use VGA to connect to legacy analog devices.

Enhanced Video Capability

Get a first-rate experience from a budget-friendly monitor. The 330 Series features Game Mode and a lightning-fast 1ms GTG response time that work together to deliver a crisp, sharp, blur-free picture with no juddering when watching video or gaming.

Environmentally Friendly

Activate the Auto Setting to reduce energy use by about 10%. The Eco-Saving Plus feature reduces screen brightness to save power, plus the screen brightness automatically transitions fluidly, reducing energy use even more. The monitor itself is constructed without PVC, meaning no toxins added to your office environment, as well as being kinder and gentler on our earth.
