

# Samsung Flow:

## Bringing people, devices and data together for true mobile efficiency

Is business mobility working for your *entire* team? Or are some workers juggling two or three devices while others use tools that keep them tethered to their desks? Now there's a way to offer enterprise productivity and mobility to *all* employees—while seamlessly connecting *all* their devices. Read on to learn about Samsung Flow.

### Finding the tools to power productivity

Making sure employees have the right tools for work is essential for high productivity and effective collaboration. Employees may need multiple devices to perform different tasks:

**Smartphones**  
for communication and quick access to apps and email

**Tablets**  
for accessing, annotating and sharing information on the go

**Notebooks**  
for heavy productivity tasks and data crunching

And, in fact, that's become the new normal for many people.

66%  
of Americans own at least two digital devices.<sup>1</sup>

1 in 3  
own a smartphone, a computer *and* a tablet.<sup>1</sup>

### Bring devices together

But when workers find themselves constantly switching between a phone, a tablet *and* a notebook to complete a task, their productivity devices can become stumbling blocks instead.

Some frustrations include:

Fumbling with separate logins for different devices

Working on a tablet while an urgent notification goes unnoticed on a smartphone

Struggling to get Wi-Fi on a notebook with no LTE capability to fall back on

Employees need to stay in sync and connected, no matter where they're working. But how?

**Samsung Flow** integrates features and functionality across devices, syncing enabled PCs and smartphones so employees can get real work done on the device of their choice.

Secure biometric login.  
Galaxy smartphone fingerprint reader effortlessly unlocks all devices

Synced notifications.  
Wirelessly connect devices to receive notifications and sync data

Mobile hotspot.  
Get on-the-go LTE access on a Wi-Fi-only device

It's another way Samsung is integrating Windows 10 Pro productivity into its Galaxy smartphone ecosystem.

### Adding a new dimension to office mobility

Samsung's innovative Windows 10 Pro 2-in-1, the Galaxy TabPro S, is purpose-built to work with Galaxy smartphones via Samsung Flow.

#### Samsung Galaxy TabPro S 2-in-1

The enterprise-ready Galaxy TabPro S with Windows 10 Pro is specially geared for a highly mobile workforce. This versatile solution offers the mobility of a Samsung Galaxy with the productivity of a Windows 2-in-1.

**Productivity.**  
Windows 10 Pro

**Mobility.**  
Ultra thin, lightweight and stylish

**Flexibility.**  
12" Super AMOLED display and full-size detachable keyboard with trackpad

**Reliability.**  
Long-lasting 10.5-hour battery life and fast charging

Samsung gives mobile employees the power to stay in touch—and securely connect all their devices

Samsung Flow syncs the Galaxy TabPro S 2-in-1 and market-leading Galaxy smartphones, giving your workforce a single, powerful mobile productivity suite.
