2. Plan the cutout : Single

It is important to observe the specified dimensions of the installation cutout for a trouble-free installation of the appliance and for the subsequent appearance of the door panel.

- In particular ensure that the cutout is square. Squareness can be checked by suitable means, spirit level diagonal measurements, etc.
- This side walls of the cutout must be flush. The minimum thickness of the side and top walls is 5/8" (16 mm).
