

Each year Samsung hosts a **\$2 million national Solve for Tomorrow competition** where students are challenged to consider how science, technology, engineering, and math (STEM) can make a change in their community. With the help of your teacher, you and your classmates can apply to compete in the Solve for Tomorrow contest and enter to win \$100,000 in prizes for your school, plus the opportunity to **work with Samsung employees to develop your prototype** that will change a community-based problem.

Through the Solve for Tomorrow competition, participants will have the chance to participate in Problem-Based Learning (PBL) that will challenge them to find a solution to a problem impacting their community.

## How do students get started?

- Visit [www.Samsung.com/solve](http://www.Samsung.com/solve) and learn about your schools eligibility for this year's contest.
- To qualify, you need to team up with a teacher employed by your school who is 21 years or older.
  - This contest is only open to US public middle and high schools, or charter schools that are at least 50% publicly funded.
  - Only teacher may apply at this time, but every teacher must have a student team.
- Talk to a teacher about the program, and forward the website information so that the teacher can review the details and register for the competition.
  - You can download the timeline from the website and the sample application to share with your teacher.
- Once the teacher has registered your team to participate in the competition, begin your brainstorming session with your teacher and classmates.
- Your teacher will submit the application but your team can help answer the questions

You and your classmates will answer 3 questions in your application:

1. What is the school/local community challenge that your students have identified?
2. What is your students' STEM solution to the challenge that they have identified?
3. How will your students ensure that their STEM solution is sustainable?

Once you have completed answering the 3 questions, you are ready to submit your full application to be reviewed by the judges.

- It's time for Problem-Based Learning, and it will be inspiring to watch the creativity come to life!

## Reasons to get involved

- Your teacher and your team will receive National recognition for your participation in the competition.
- Access to Samsung employees, internships, discounts, letters of recommendation and more through our alumni program.
- Prizes are awarded at every level and you have the chance to win over \$100,000 in tech and classroom supplies for your school.
- The whole team will find an appetite for STEM and new passions.
- You will be helping your community!
