Galaxy S9

Enterprise mobile reimaged.

Never before have mobile devices been as essential for business. The Galaxy S9 Enterprise Edition combines state-of-the-art software and hardware with support and services to help businesses unlock the next mobile economy.

Easy to provision and customize.

The way you want it, right out of the box. Knox™ Configure is a cloud-based tool that allows you to get out of the box quicker. Remotely provision and configure one or many of your Galaxy S9 Enterprise Edition devices while skipping unnecessary setup screens. Knox Configure also allows you to install the right applications, control fine grain device settings and apply company branding for a custom experience.

Take complete control.

Over-the-air updates ensure everything runs like clockwork. Enterprise Firmware Over-The-Air updates (E-FOTA) with the Galaxy S9 Enterprise Edition give you complete control. Schedule updates for your devices so they always have the right firmware and software. With E-FOTA, your team's devices are always compatible with your company's solutions, and every device remains a secure one.

Keeping it secure.

The security updates you need to support your business. The Galaxy S9 Enterprise Edition keeps your team and your company secure, with regular security updates for up to 4 years after market availability.¹ It's the ideal solution for data security.

Shed the bloatware.

All you need and nothing more. The Galaxy S9 Enterprise Edition has no pre-loaded carrier apps, so your organization can deliver a more predictable and consistent experience across devices, and have greater freedom to customize device software.

Count on continuity.

Welcome to a longer life for technology. The Galaxy S9 Enterprise Edition offers lifecycle management that delivers 2 years of purchase assurance, giving you business continuity so your people can work without interruption.
