What is SMART HOME DONGLE?

SMART HOME DONGLE is an optional device to operate Wi-Fi function or run Samsung SMART HOME App by mounted on Smart READY appliances of Samsung Electronics Co., Ltd. (not provided)

Application of SMART HOME DONGLE

- Use SMART HOME DONGLE for Samsung Smart READY appliances.
Installation of SMART HOME DONGLE

Installing SMART HOME DONGLE

• Install the dongle at the given position of each Samsung Smart READY appliance.
• Refer to the appropriate manual of Samsung Smart READY appliances for the installation position.
• Download a manual of each appliance at www.samsung.com and refer to it.
• Refer to an application manual or a user manual of each Smart READY appliance for using the application.

Installation of Smart Home App

[Setting the network]
Connect the wired/wireless router to the SMART HOME DONGLE wirelessly.

[Registering Smart Home Service]
Register the service using Smart Home app on your Smartphone.
Setting the network

Note
• For the certification and cipher type of wired or wireless router, recommended use WPA/TKIP or WPA2/AES. It does not support a new Wi-Fi certified specification and non-standard Wi-Fi certification type.
• The quality of wireless network connection can be affected by surrounding wireless circumstance.
• If an internet service provider registered the user's PC or MAC address (Identification number) of the modem permanently, the SMART HOME DONGLE cannot be connected to the Internet. Please contact the internet service provider and inquire about the internet connection process to connect a device (e.g. SMART HOME DONGLE) to the Internet.
• The Internet may not be connected due to the firewall. Please contact the internet service provider and request the solution.
• If you followed what the internet service provider directed but cannot still connect the internet, please contact the service center.
Specification of wired/wireless router for Samsung SMART HOME dongle

- Please refer to the user manual for installation of your wired/wireless router.
- Specification of wired/wireless router for Samsung SMART HOME DONGLE
- Samsung SMART HOME DONGLE supports the IEEE802.11 b/g/n(2.4GHz), Soft-AP method communication protocol. (Samsung Electronics recommends use of IEEE802.11n.)
- If the wired/wireless router is not a Wi-Fi certified product, it may not be connected to the SMART HOME DONGLE.
Download Samsung Smart Home App

Registering Samsung account

- Before using the Samsung Smart Home App, register the Samsung account.

Note

- If you run the Samsung Smart Home App but the auto login is not set, the Samsung account screen appears only one time in the initial process.
Downloading Samsung Smart Home App

- You can download the Samsung Smart Home App by searching "Samsung Smart Home" on Play store, Galaxy Apps and iPhone App Store.

Note
- Samsung Smart Home app supports android operating system 4.0 (ICS) or higher and is optimized with Samsung Smart phones (Galaxy S or Note series). If you run the App using a Smartphone manufactured by other companies, some functions may operate differently.
- For iPhone users, iOS7 or higher supports the App.
- Samsung Smart Home App is subject to change without notice for product improvement purposes.
Registering the product

- Before using the Samsung Smart Home App, register the product to the Samsung Smart Home Service.

Android

1 Search(a) or select(b) the user's country and press the Save button.
2 Select the Samsung Smart READY appliance icon, which will be registered.

3 Enter the password of wireless router which will be connected and then press the Next button.
   - If you want to change the connected router, press the icon(d) and select AP name of the wireless router.

**Note**
- When the guidance screen for changing the network setting appears, uncheck the box that says 'Smart network switch'.
4 Set the Samsung Smart READY appliance according to the guidance on the screen.

5 Network setting is performed automatically.

Troubleshooting

Download

Samsung Smart Home App cannot be searched on Play store, GALAXY Apps or iPhone App Store.

Samsung Smart Home app supports android operating system 4.0(ICS) or higher. For iPhone, iOS 7 or higher supports the App.

Sign in

Samsung account cannot be accessed.

Check your ID and password on Samsung account screen.
Connection

After installing Samsung Smart Home App, the Samsung Smart READY appliance cannot be connected to the App.

Unplug the Smart READY appliance and plug in it again, and then set Samsung Smart Home app and Wi-Fi again according to the guidance in the manual.

The failure message appears when the device is being added.

The failure might be temporary due to the distance between the wired or wireless router and the air conditioner or other problems. Try it again after a while. Unplug the SMART HOME doing and pulg in it again. Try it again after a while.

Function

The control function of Samsung Smart Home App does not work.

- Check whether the Samsung Smart READY appliance is connected to the wired or wireless router correctly.
- Check whether the wired or wireless router is connected to the Internet correctly.
