

4 Steps to make your buildings more energy efficient

Samsung is the first company in nine years to receive **Energy Star's Corporate Commitment award** for Climate Efforts from U.S.

Builders can leverage that dedication into energy efficiency tax credits and improved efficiency for their customers.

By understanding the needs of homebuyers today, Samsung is developing innovations for tomorrow.

Refrigerators

2020 winner of EPA's ENERGY STAR Emerging Technology Award.

9% energy savings over standard refrigerators.

R-600a refrigerant system saves energy (6.5%) and greenhouse gas emissions.

Connectivity

Simplified homes with the convenience buyers are looking for.

Family Hub has built-in Alexa and a number of additional capabilities.

SmartThings app connects appliances to enable energy efficiency.

Microwaves

High-capacity models work economically to heat food.

Sensor Cook ensures food isn't overcooked.

Eco Mode saves energy when not in use by turning off display.

Dishwashers

EPA-recognized efficiency and innovation.

Up to 80% water savings and 50% energy savings vs hand washing.

AutoRelease door saves energy during drying.

Visit samsungbuilder.com to learn how Samsung can help you envision your perfect build today.
