OHN-SK / OHN-DK Series Single- or Dual-Sided Outdoor Signage

Deliver messages that stop people and command attention. The Samsung OHN/OHN-D series displays were designed for exceptional visibility and dependability in outdoor locations. With a high-brightness 3,000-nit screen and a built-in dimming sensor, content is impactful day or night. The OHN/OHN-D series displays are well-prepared for harsh outdoor environments, with Magic Protection Glass¹ and IP56-rated protection.² A built-in media player allows users to manage content efficiently without any additional equipment required. And to stop traffic both ways, the OHN-D series has a double-sided screen, as well as an easy-access design for effortless upkeep and repair.

¹Additional glass needed for OHN-SK kit-type. Non-kit version to be released at a later date.

Key Features

High Visibility and Brightness, 24/7

With 3,000-nit brightness and 24/7 performance, the OHN series delivers consistent, exceptional content. A built-in dimming sensor automatically adjusts brightness based on the external lighting environment, saving power consumption and operating expenses.

Anti-Reflective Magic Glass

Samsung's Magic Glass cuts glare from direct sun, ensuring your messages are always legible.

Viewable with Polarized Sunglasses

Samsung's circular polarizing technology allows content to be easily viewed even while wearing polarized sunglasses.

Reliable in the Harshest Environments

Samsung OHN series displays employ a patent-pending steady cooling system with heat exchanger that allows them to withstand temperatures of -22° F to 122° F. They're also IP56-certified,² to withstand sun, rain, sleet, snow, wind-driven dust, hose-driven water and exhaust emissions.

Designed for Durability

The OHN Series is built to withstand abuse. Tempered Magic Glass features IK10 certification,³ and offers protection from ballistic impact. And a special coating provides protection against graffiti.

Embedded Media Player

The embedded MagicInfo Player, backed by the powerful Tizen operating system, allows for easy content management and ensures seamless content transition and playback. All without the need for an external signage player or PC.

A Double-Sided Screen with Slim Depth

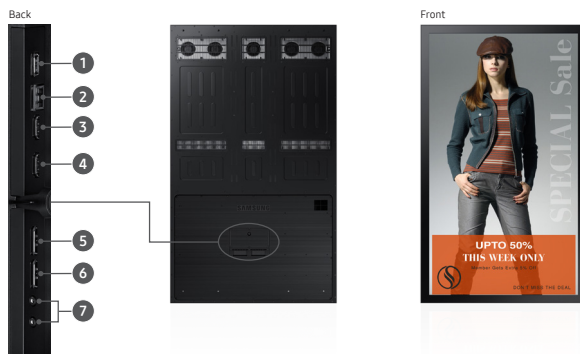

The OHN-D series has two screens to highlight brilliant content and graphics on each side. With 3,000nit brightness on both sides of the display, users can double their marketing in one location with vibrant content. Its slim design is ideal for a bus shelter or street billboards.
