

Reclaim your space.

Space Monitor SR750 Series

Presenting up to 40% more usable space. The Samsung Space monitor gives you the ideal combination of a large monitor with lots of desk space. The Space monitor stays folded flush against the wall until you need it, then when you do, just pull it forward to the perfect position. When you're done, just push it up and out of the way, and you get your desk space back. And with a simple clamp that's universal, installation is quick and easy.

Key Features

Easy and Clean Installation

The integrated clamp makes it simple to install. Built-in cable management and simple connectivity (HDMI, Mini DisplayPort) keep things clean.

Space-Maximizing Design

No-gap design allows the Space monitor to sit flush against the wall when you're not using it.

Space Technology

User-friendly technology includes a durable hinge and a zero-level stand for precise adjustability.

High Picture Quality and Color Accuracy

Get stunning, lifelike image quality with WQHD 2560 x 1440 resolution (27") or 4K UHD 3840 x 2160 resolution (32"). Enjoy rich colors with sRGB color space and 1 billion colors.

High Refresh Rate

The high 144Hz refresh rate on the 27" Space monitor delivers lower cursor lag and amazingly sharp, super-smooth video. Blurring, ghosting and juddering are eliminated.

Multi-Tasking

Picture By Picture and Picture In Picture allow you to connect two sources at once to the Space monitor, and Easy Setting Box software makes it easy to choose and adjust the layout of your open windows.

Premium Panel

The Samsung VA panel offers wide viewing angles, a best-in-class 3000:1 contrast ratio (27") and deeper blacks. And thin bezels offer a sleeker profile.

It's your space. You may as well use it.

You don't need a bigger desk. You just need to use what you have more efficiently. The Samsung Space monitor folds up and out of the way when you're not using it, and is ready to go when you are.

Space-Saving Design

When it's time to work, it's easy to pull the Space monitor toward you and adjust it to your preferences. When you're finished with it, the no-gap design lets you simply push the Space monitor flush up against the wall, leaving desk space clear.

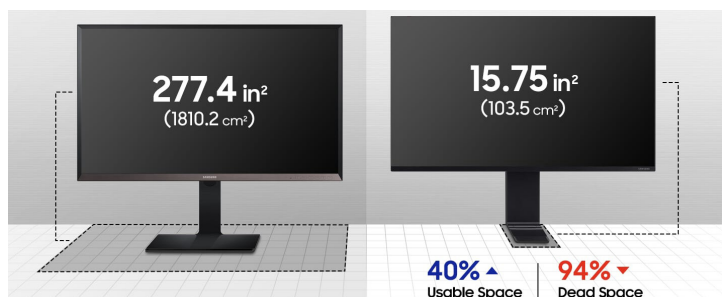

Robust Hinge

The durable hinge with integrated clamp is designed for long-lasting durability and precise positioning of the screen, time after time.

Maximized Desk Space

The Samsung Space monitor provides up to 40% more usable surface area than conventional monitors, occupying just 4.5" x 3.5" of desk space.

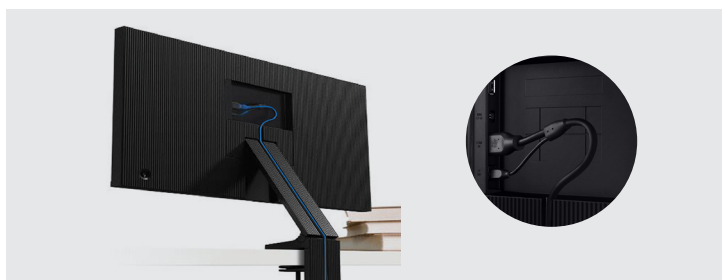

Easy Installation

The integrated clamp attaches to virtually any desk up to 3.5" thick, for quick and easy installation to a range of desks and tables. And it's rubber-lined to prevent scratches.

Concealed Cables

Cables sit cleanly in a recessed chassis, allowing the Space monitor to sit flush against the wall. Stray cables won't get in your way, and your desk will be clean and clutter-free.

Zero-Level Stand/Adjustable Eye Level

The zero-level HAS (Height Adjustable Stand) lets you position the Space monitor precisely where you want it, from eye-level all the way down to sitting directly on your desk.
