

Enjoy a stunning picture while maintaining your budget.

Budget-Friendly Monitors with Improved Image Quality

Presenting the best of both worlds. The Samsung SR650 series monitors deliver a premium picture and full connectivity while also being budget-conscious. Premium IPS panel technology means incredible picture and vivid colors across every inch of the screen. The virtually bezel-less design creates nearly seamless dual monitor setups which, combined with up to 178 degree viewing angles, aids collaboration. The SR650 series also features less than 0.3W power consumption, Smart Eco Saving technology, Energy Star 8.0 and a fully adjustable stand, making the Samsung SR650 the easy choice.

Key Features

Impressive Picture Quality

With an IPS panel, the SR650 series provides premium picture quality with vibrant color reproduction and crystal-clear images and text without color shift. IPS technology also provides wide viewing angles of 178°, so your content isn't degraded and collaboration with co-workers is easy.

Ultra-Thin Bezels

Text and graphics are beautifully presented in a 3-sided bezel-less frame, so you see more picture and less plastic. With ultra-slim bezels, multiple monitor configurations are seamless.

Fast, Easy Connectivity

DisplayPort, HDMI, VGA, USB hub (x4) and an audio jack give users flexibility in high-speed connectivity. Whatever devices users need to connect today or in the future, the SR650 series keeps everyone's options open.

Ergonomic, Adjustable Stand

The monitor swivels, tilts, pivots and is height-adjustable, for comfort over a long workday. VESA compatibility makes installation on a wall or separate mounting arm easy.

Easy On the Eyes

Eye Saver Mode lowers blue light levels, for reduced eye strain during long work hours. Flicker-free technology adds further viewing comfort by eliminating flickering at all levels of brightness.

Energy-Saving Display

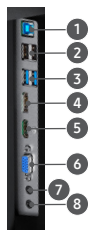

Smart Eco Saving technology achieves power consumption reductions of up to 10%, while still maintaining picture quality. It adjusts the brightness of the screen's black sections while simultaneously adjusting the RGB gain values, so the screen looks just as bright as you're used to.
