SAMSUNG

Freedom to do more.

Unlock true mobility and empower productivity through untethered freedom, security and an optimal user experience.

The Samsung Galaxy Note8 empowers you to work without barriers and to do bigger things. And you can do even more with the Unlocked by Samsung version. Designed to give you the flexibility you need to make the best decisions for your business, Unlocked by Samsung smartphones allow you to choose the carrier that works best for you. It's the ultimate multitasking device for those who want to do bigger things in work and in life.

Unlock freedom.

Carrier or no carrier. It's your choice. With Unlocked by Samsung smartphones, you have the freedom to choose what works best for your employees.[1] You can standardize on one device across multiple carriers, greatly simplifying IT. And no-contract Unlocked by Samsung smartphones can be customized for a company's Wi-Fi only environment where no carrier is necessary.

Unlock the mobile device experience.

Unlocked by Samsung smartphones don't come pre-loaded with any carrier apps, so you have a consistent UI, and you can customize device software exactly the way you need it. And Unlocked by Samsung smartphones are optimized for U.S. carrier networks,[1] with access to exclusive Samsung services like Knox and Samsung+ personal support.[2] Nothing will hold you back.

Unlock value.

When everyone has the same user interface, you have lower training, support and connectivity costs. You have the right contract with the carrier of your choice, or even have no carrier at all. Software updates are easily managed, and you can configure devices in bulk. And your unlocked devices are CapEx assets. With Unlocked by Samsung smartphones, you save from start to finish.

Be more impactful.

Get bright, sharp, true-to-life colors with the Mobile HDR Premium-certified Quad HD+ Super AMOLED display.[3] And with a high screen-to-body ratio, you'll get a bigger view in a slimmer phone. Whether you're shooting in the dark or from a distance, photos are clear with less blur[4] on the world's first dual camera with Optical Image Stabilization with both lenses. Pro Mode gives you all the options you'd expect from a DSLR. And the 10nm high-performance, energy-efficient application processor and 6GB RAM will keep you running at top speed.

Be more efficient.

With the smartest and most advanced S Pen yet, you can mark up photos and annotate PDFs with ease. You can even draw or take up to 100 pages of notes without unlocking your phone. With Live Message, you can bring your communications to life by creating and sharing animated messages or simple diagrams that play back exactly as you wrote them.[5] You can also use S Pen to seamlessly translate words or phrases by choosing a language from the menu, hovering over the on-screen text, and seeing or hearing the translation.

Be more secure.

The Samsung Knox security platform[6] is embedded within the hardware to ensure security from the chip up, right out of the box. Used by 30 governments and voted "most strong" by Gartner,[7] Knox features separate work and personal container solutions that guarantee user privacy while encrypting sensitive corporate data.[8] And for added security, advanced iris scanning and fingerprint identification mean the Galaxy Note8 smartphones can be accessed with just a simple look or touch.
Be more productive.

Employees stay connected with an all-day battery[9] that offers adaptive fast charging and wireless charging.[10] Expandable storage up to 256GB[11] gives mobile workers the agility to pack more projects to go, and IP68 water resistance[12] keeps them up and running in all environments and weather conditions. And the optional DeX Station lets you connect the Galaxy Note8 to a monitor, keyboard and mouse[13] for a rich, desktop-like experience.
