

SAMSUNG

The power to work

Galaxy Note20 5G and Note20 Ultra 5G

Meet the phones that enable you and your team to meet the moment.

The need for seamless remote working and collaboration is greater today than it's ever been. You and your team are more spread out, yet need to work more closely. Introducing the phones made to maximize this moment. Introducing the Samsung Galaxy Note20 5G Series.

Samsung Note

Take noteworthy notes wherever and whenever you want

Video Conference

Seamless working experience with video conference

Knox

Protecting your business from the inside

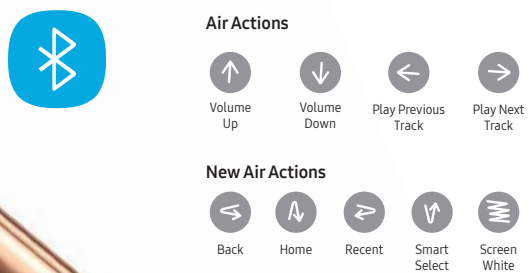

Improve personal productivity.

The Galaxy Note20 5G Series gives you the power of a PC in your pocket. With an even more improved version of our acclaimed S Pen, you can easily take notes and export to Microsoft Office formats, mark up PDFs, access cloud-based files, revise presentations, then store and access them all in the cloud.

Be more responsive with the refined S Pen.

The more responsive S Pen¹ feels like you're using a real pen to take notes, sketch ideas and sign documents. New Air Actions help you work quicker by allowing you to control the camera zoom, remotely swipe through your Gallery and even adjust volume with a flick of your wrist.

Do more than take notes.

Use the S Pen in conjunction with our more intelligent Samsung Notes to do more than ever. Take notes and sync them for sharing and access anywhere. Create documents by exporting notes to Microsoft Word or PowerPoint. Even import a PDF directly into Notes and mark it up, then share it with your team.

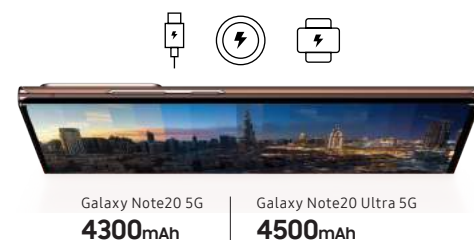

Microsoft integration turns anywhere into your office.

Integration with Microsoft Office² helps the Galaxy Note20 5G Series give you the productivity of a mobile PC. Microsoft Office apps live natively on the Galaxy Note20 5G Series, allowing seamless workflow with S Pen, Notes and more. Sync files and photos across devices with OneDrive. And stay on top of your inbox with Microsoft Outlook.

It keeps you working all day long.

The brilliant 6.9" Galaxy Note20 Ultra 5G³ features an adaptive 10-120Hz Dynamic AMOLED 2X display³ that adjusts based on your apps and content to maximize battery life. Both the Galaxy Note20 Ultra 5G and the 6.7" Galaxy Note20 5G³ are powered by a HyperFast processor, and feature an all-day intelligent battery that continually optimizes power.⁴ And if you do find yourself low, you can get hours of power in minutes with super-fast charging.⁵

Never lose track of what's important.

Galaxy Note20 Ultra 5G features the latest ultra-wideband technology, which gives you new spatial and directional awareness, enabling you to find tagged items.⁶ Find everything from warehouse inventory to car keys.

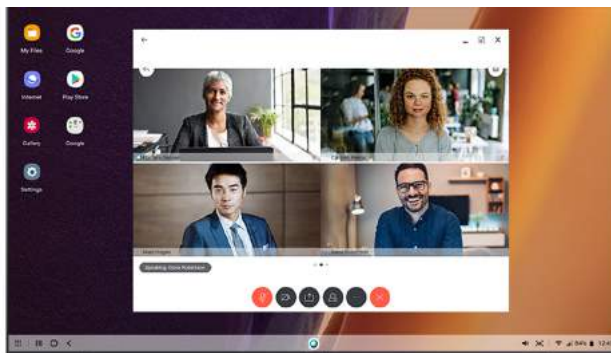

Simplify team collaboration.

The Galaxy Note20 5G Series helps make collaboration seamless. Everyone can remotely access the same cloud-based data at a moment's notice, edit documents and re-upload to the team, host impromptu video calls from anywhere and more. All without having to rely on a laptop or desktop PC.

A complete desktop experience, wirelessly.

Samsung DeX now connects wirelessly.⁷ You can take your apps anywhere. Connect to your home TV, add an optional keyboard and mouse⁸, and start multitasking. Use your phone as a second screen, take conference calls, share Microsoft documents with your team and edit on your TV screen in real time, all while checking texts and taking calls on your phone.

Work faster with seamless phone and PC integration.

With Link to Windows,⁹ you can connect your Galaxy Note20 5G Series smartphone to your laptop, and have access to your phone's data from your PC. Manage up to six mobile or Windows apps at once, drag and drop files between devices, grab pictures from your phone and place them in presentations on your desktop, then share them via email or text from your PC.

Collaborate seamlessly.

The Microsoft integration that makes you personally productive makes your entire team productive. With common access to cloud-based data and the ability to natively edit documents on their phones, your entire team can keep the project moving from wherever they are.²

Sharing is as easy as pointing.

With the Galaxy Note20 Ultra 5G's Point to Share, you can share information from a distance.¹¹ Simply select the documents or videos you want to share, then point your Galaxy Note20 Ultra 5G at your team member's compatible device, and tap Share.

Work and share at the speed of 5G.

Keep remote and distributed workforces better connected with Galaxy Note20 5G Series HyperFast 5G speeds.¹⁰ With more bandwidth, you can quickly upload and download huge files, stream videos to the group over a conference call for more seamless collaboration, and create a private and more secure 5G hotspot wherever you are.

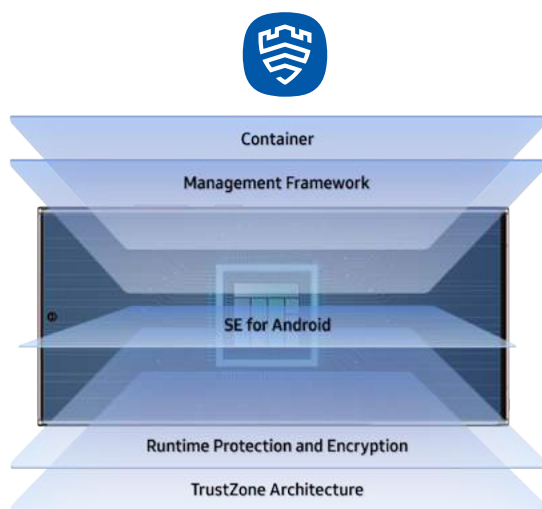

Work with complete trust and easy device management.

Work without worrying about your data or device. Our Knox defense-grade platform helps protect you the moment the device is powered on, and a suite of cloud-based configuration and management tools makes it easy for IT to keep the team running smoothly and in sync with each other, all remotely.

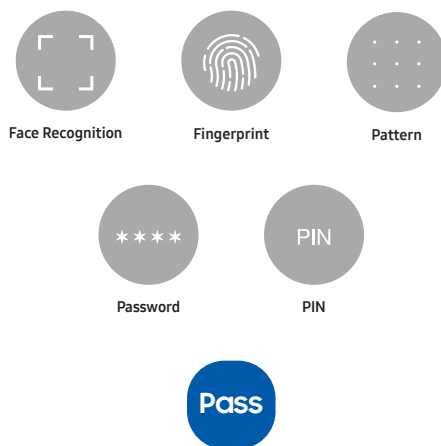

Defense-grade security helps keep all your data safe.

The Galaxy Note20 5G Series features a Secure Processor dedicated to protecting your PIN, password, pattern and Blockchain Private Key. Biometric authentication helps keep private data private. And for an extra layer of protection, you can create a Secure Folder to help keep personal content private.

The more protection, the better.

Samsung Pass lets you conveniently and securely access accounts and apps with just your fingerprint. And when you use Samsung Pay or Samsung Health, credit card details and health data are protected.

Never be without your Common Access Card.

For government agencies and other businesses leveraging Common Access Cards, the Galaxy Note20 5G Series supports enhanced ciphers and signatures, allowing them to be used as digital CACs.

Easily manage a remote and distributed workforce.

In addition to hardware-based protection, Samsung Knox also offers cloud-based device management. Knox cloud solutions provide IT admins with a comprehensive set of enterprise tools to manage their mobile portfolio through the entire device lifecycle.¹²

- Knox Configure enables quick and simple bulk device setup and rebranding
- Knox Mobile Enrollment offers automated EMM enrollment out of the box
- Knox Manage provides cross-platform EMM capabilities that are highly optimized for Samsung devices and includes features to remotely troubleshoot devices
- Knox E-FOTA helps IT take control of OS version updates and security patch releases
- Knox Platform for Enterprise offers advanced features designed specifically for enterprise, allowing customers to secure data, customize controls and protect their networks.

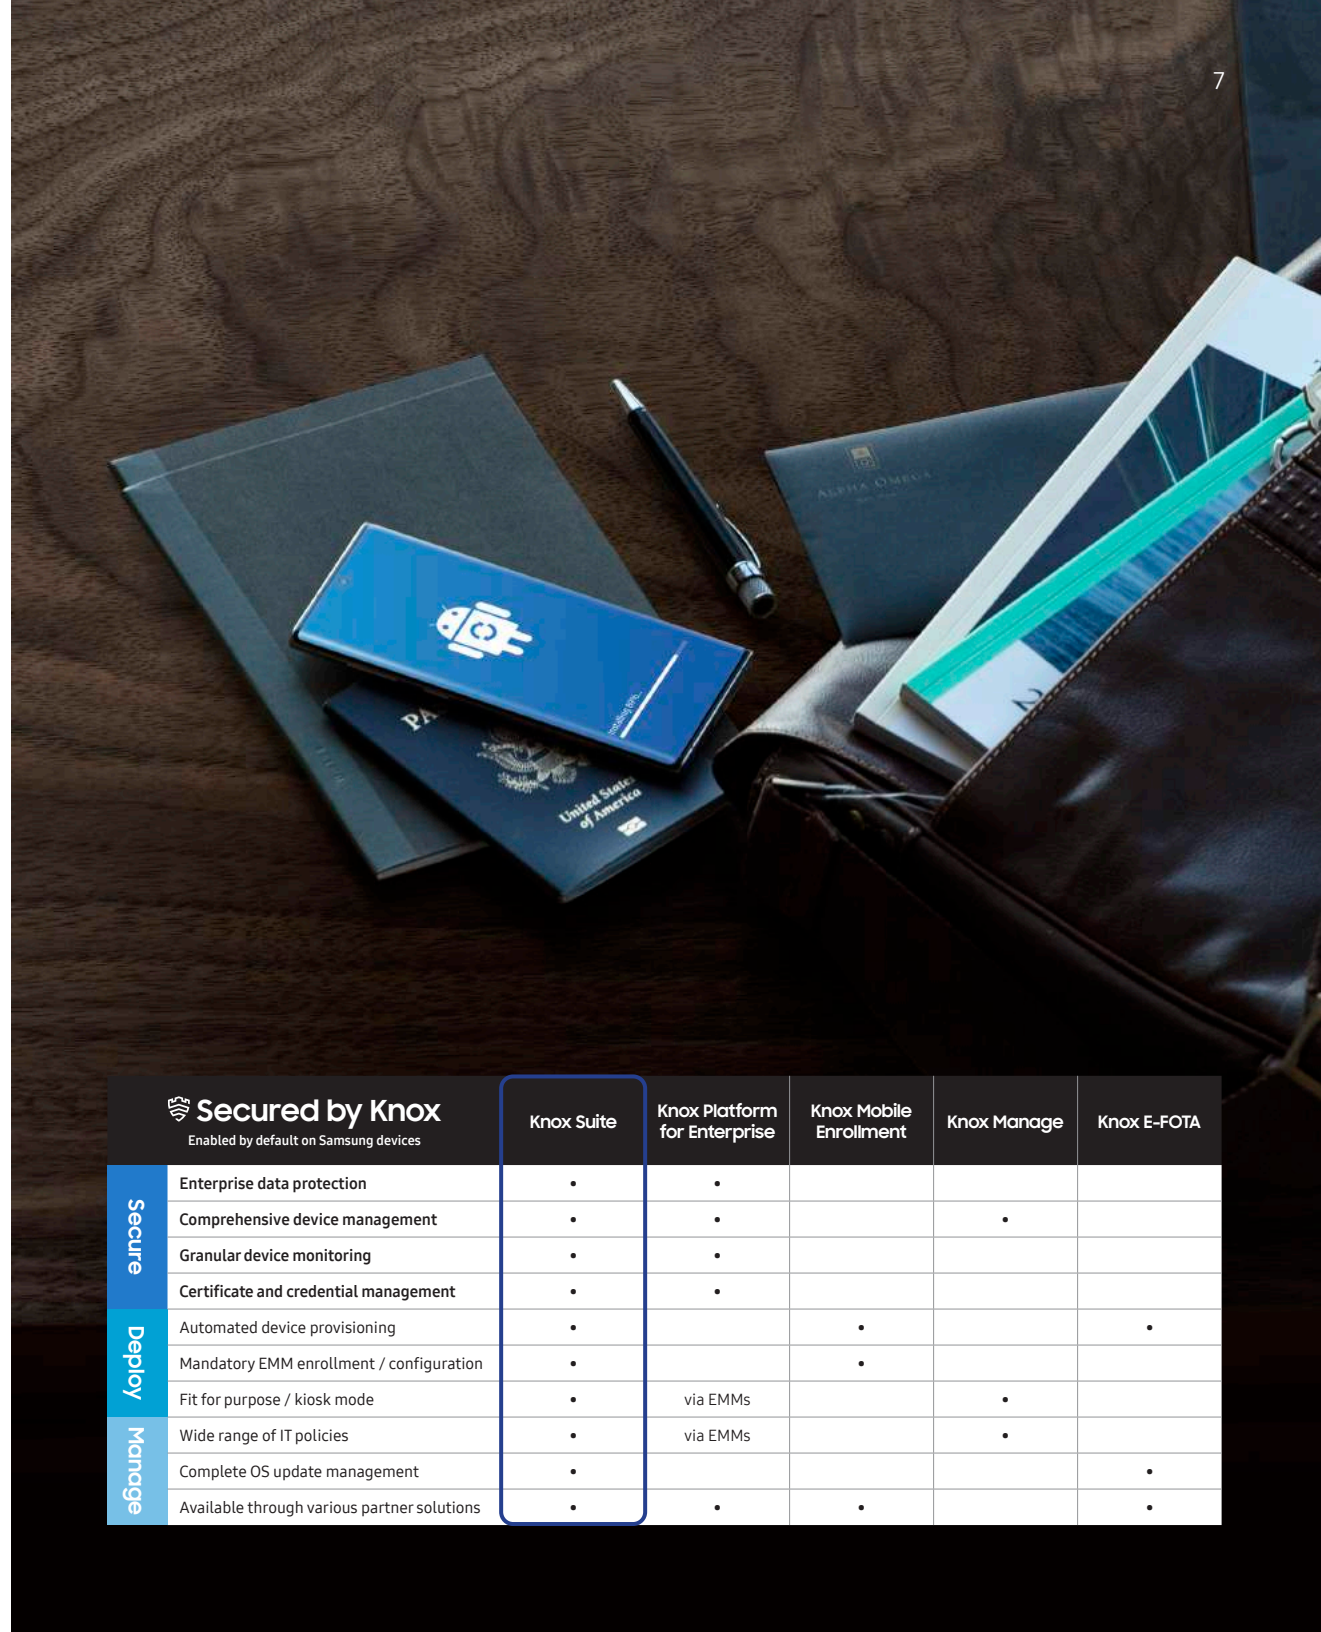

Secured by Knox

Services that drive your business forward.

For businesses large or small, Samsung offers scalable mobility services, device protection and expert assistance.

¹Compared to Galaxy Note10. ²Microsoft Office license required for purchase to edit Excel, Word or PowerPoint documents. License sold separately. ³Measured diagonally, the Galaxy Note20 Ultra 5G screen size is 6.9" in the full rectangle and 6.8" accounting for the rounded corners, while Galaxy Note20 5G is 6.7" and 6.6". Actual viewable area is less due to the rounded corners and camera lens. Note20 Ultra default screen refresh rate is 120Hz/FHD. Quad HD+ requires screen setting at 60Hz screen refresh rate. ⁴Based on average battery life under typical usage conditions. Average expected performance based on typical use. Actual battery life depends on factors such as network, features selected, frequency of calls, and voice, data and other application usage patterns. Results may vary. ⁵When using the included charger and cable. ⁶Ultra-wideband is supported in Galaxy Note20 Ultra 5G only. ⁷Wireless DeX requires smart TV with Miracast support, and both devices must be on the same Wi-Fi network. ⁸Monitor, keyboard and mouse sold separately. ⁹Link to Windows requires the Your Phone app (free download), a Microsoft account and Windows 10. Some mobile apps may have security features that prevent the mobile app from being viewed on PC. ¹⁰Requires optimal 5G network connection, available in select markets. Check with your carrier for availability and details. Download and streaming speeds may vary based on content provider, server connection and other factors. ¹¹Point to Share works between Samsung devices that support ultra-wideband (UWB) technology. UWB is supported in Galaxy Note20 Ultra 5G only. UWB Accuracy: Distance (±4" within 11.5'), Angle (±5°). ¹²Free trials are available for these services. Please check samsung.com/knox for more information. Additional licenses are required for Knox Configure, Knox Manage and Knox E-FOTA. Knox Platform for Enterprise requires additional licensing for premium features. ¹³Plans are sold based on MSRP or price paid by end-customer, whichever is less. Total duration includes one year of standard limited warranty. Labor-only costs for mechanical and electrical breakdown are covered from date of purchase. Both parts and labor costs are covered after the manufacturer's warranty expires through the plan term. External hardware such as cases and styluses are not included. ¹⁴Limited to configurations of fewer than 500 devices and a maximum of 8 user/administration groups. If you have specific requirements beyond those provided by QuickStart Services, including integration with third-party solutions, please contact your partner or your carrier, or email samsungbusinessservices@sea.samsung.com. ¹⁵Total amount of available memory may be less based on configuration. ¹⁶Portion of memory occupied by existing content. ¹⁷MicroSD card sold separately.
