

SAMSUNG

The phone designed for epic
collaboration for the modern workday.

Galaxy S21 5G | S21+ 5G | S21 Ultra 5G

Built for the modern workday.

Video is the new conference room. Ideas are exchanged over laptops instead of water coolers. Whether you're in the office, at home or somewhere else, the workday has changed. The silver lining to all this change is the massive amount of innovation happening throughout business. Introducing Samsung Galaxy S21 Series smartphones. They'll put the future of business firmly in your hands. And it's going to be epic.

Work collaboratively.

New ways of working demand new ways of collaborating. The Galaxy S21 Series features a camera that enhances recorded and live video, while Wireless DeX makes sharing content between your devices easier than ever.

Collaboration in 8K.

The Galaxy S21 Series features 8K video, to let you capture and share every detail of what you're seeing. The entire team can see every detail of your on-site video, your sketches and your flowcharts. And 8K Video Snap lets you save and share high-resolution stills from your videos, so you can get a better look at those building inspection details or that marked-up whiteboard.

Pro-quality videos with a personal touch.

Director's View lets you stream or shoot video from the front and rear high-resolution cameras simultaneously. You can more effectively take your business online with a narrated virtual tour. You can create more engaging training videos. You can give all your explainer videos greater impact.

Put collaboration on the big screen.

Use Wireless DeX to connect Galaxy S21 Series smartphones to your smart TV or Samsung Smart Monitor wirelessly, and work off your phone on the big screen. The Galaxy S21 Series smartphone becomes a second screen, so you can join your next conference call on your TV while multi-tasking on your phone.¹

Note-taking gets a major upgrade.

The Galaxy S21 Ultra 5G brings the ease of an S Pen (available separately) to the Galaxy S Series.² Capture ideas, take and share notes, edit collaboratively in real time.

Work seamlessly.

Work now. Work later. Work here. Work there. Galaxy S21 Series smartphones integrate your most common business apps and processes, to remove limitations to your productivity.

Microsoft integration wherever you are.

Getting work done on your smartphone is more important than ever before. The Galaxy S21 Series comes with integrated Microsoft Office, OneDrive and Teams.³ You can instantly access and update your files, and keep all your docs, calendars, reminders, notes and every other aspect of your life in sync.

Work on your phone without being on your phone.

With Link to Windows, the Galaxy S21 Series seamlessly connects with your Windows PC.⁴ Manage calls, text messages and phone notifications from your PC. You can also easily drag and drop files between your Galaxy S21 Series smartphone and your PC.

Sharing is as easy as pointing.

Ultra-Wideband (UWB) technology enables Point to Share. Simply select the documents or videos you want to share, then point your Galaxy S21+ 5G or Galaxy S21 Ultra 5G at your team member's compatible device, and tap Share. UWB also enables you to find tagged items such as warehouse inventory.⁵

Work productively.

The Galaxy S21 Series is filled with speed, power and ease of use that make it ideal for the new way of working.

Innovation comes quickly. Be ready with 5G.

Full 5G support on the Galaxy S21 Series means you'll be working faster and more securely than ever.⁶ Download large files quickly, video chat with virtually no lag. You can also create your own 5G hotspot, to avoid all the security concerns of public Wi-Fi.

Move at the speed of business.

With a HyperFast processor, you'll have a supercomputer in the palm of your hand. Transform your idea sharing, live streaming, video editing and multi-tasking at HyperFast speeds.

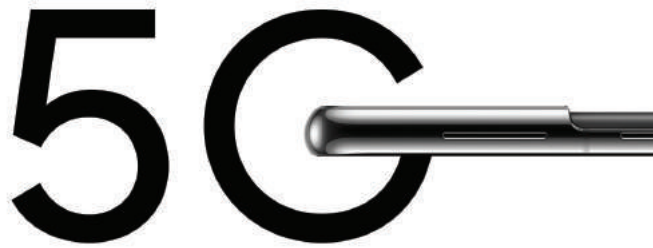

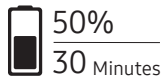

All-day battery, and then some.

Galaxy S21 Series intuitively manages usage to conserve energy, so you can go all day (and then some) without charging.^{7,8} The All-Day Intelligent Battery powers every scroll, click, tap and video conference without your worrying about having to stop.

Be ready for every challenge and opportunity.

Be ready for anything. The Galaxy S21 Series features Super-Fast Charging to make sure your team is back in action as quickly as possible, with more than 50% charge in just 30 minutes.⁸

Easy on the eyes, day or night.

Our bright, adaptive 120Hz display automatically adjusts based on your tasks, to conserve battery life. It also makes scrolling feel faster⁹ and silky smooth. And intuitive blue-light management adjusts based on time of day to reduce eye fatigue.

Better and brighter.

The Galaxy S21 Ultra 5G features our brightest display yet. You'll be able to see texts and emails even in the bright outdoors, thanks to a 1500-nit screen with an incredible 3,000,000:1 contrast ratio. And the Galaxy S21 Ultra 5G adaptive display delivers WQHD+ resolution at any screen brightness, from 10Hz-120Hz.

Work securely.

Working quickly is nothing if you're not also working securely. The Galaxy S21 Series features defense-grade security, as well as end-to-end mobile fleet management.

Your business is no one else's business.

The Galaxy S21 Series helps protect all your sensitive, confidential data with the Samsung Knox defense-grade security platform. It's designed from the chip up to help protect you from intrusion, malware and malicious threats.

An extra layer of extreme data protection.

The Galaxy S21 Series features Knox Vault, a combination of our Secure Processor and tamper-resistant Secure Memory. Knox Vault is dedicated to protecting your PIN, password, pattern, Blockchain Private Key, Samsung Pass and more. Biometric authentication helps keep private data private. You can create a Secure Folder to help keep personal content private. And with Private Share, you can securely share files and images, and revoke access even after sharing.

Mobile management made easy.

Knox Suite offers a complete set of cloud-based end-to-end mobile management solutions. From deploying software updates to deep customization, Knox Suite keeps your entire mobile fleet secure and in sync.

¹Wireless DeX requires smart TV with Miracast support, and both devices must be on the same Wi-Fi network. ²S Pen sold separately. ³MS Office license required for purchase to edit Excel, Word or PowerPoint documents. License sold separately. ⁴Link to Windows requires the Your Phone app (free download), a Microsoft account and Windows 10. Some mobile apps may have security features that prevent the mobile app from being viewed on PC. ⁵Point to Share and tracking works between devices that support Ultra-Wideband (UWB) technology. UWB is supported in Galaxy S21+ 5G, Galaxy S21 Ultra 5G, Galaxy Note20 Ultra 5G and Galaxy Fold2 5G. ⁶Requires optimal 5G network connection, available in select markets. Check with your carrier for availability and details. Download and streaming speeds may vary based on content provider, server connection and other factors. ⁷Based on average battery life under typical usage conditions. Average expected performance based on typical use. Actual battery life depends on factors such as network, features selected, frequency of calls, and voice, data, and other application usage patterns. Results may vary. ⁸Charger sold separately. Super-Fast (25W) charger also sold separately. Use only Samsung-approved chargers and cables. Do not use worn or damaged chargers or cables. Incompatible charger or cable can cause serious injuries or damage to your device. ⁹Compared to 60Hz screens. ¹⁰Actual viewable area is less due to the rounded corners and camera lens. ¹¹Compared to previous S Series. ¹²Total amount of available memory may be less based on configuration. ¹³Portion of storage occupied by existing content.
