

Protect your device against theft and loss and stay worry-free

For enterprises that have the foresight to safeguard their Samsung mobile devices and the data they hold, Knox Guard is an affordable, easy-to-use solution. Knox Guard leverages best-in-class Samsung Knox security to prevent or significantly reduce the risk of theft and loss. With Knox Guard, IT managers can permanently lock the device, rendering it incapable of any function except calling the device owner, thereby aiding recovery.

By leveraging Knox security, Knox Guard offers best-in-class protection against unauthorized usage and data leak on lost and stolen devices.

Control how and when a device is locked and fine-tune the experience as needed with granular policy control.

Robust lock screen features and customization go beyond your typical EMM lock solution. And Knox Guard is supported by most Galaxy devices.

Knox Guard

Protect your investment

Samsung devices help your team work faster, better and smarter. Protect your fleet of devices with Knox Guard and enable protection schemes against theft and loss straight out of the box.^{1,2}

Highly secure lock

With hardware-level security built from the chip up, Knox Guard offers extra protection against theft and loss.

- Protects devices straight from manufacturing, keeps working even after reset/rooting attempts
- Block unauthorized firmware or binary editing
- IMEI tamper-proof with our own, secure device identifier technology
- Network bypass-proof
- Restrict usage even when devices are offline
- Restrict malicious VPN/proxy usage

Granular restrictions

A wide range of flexible features helps protect against and helps you react to every possible threat.

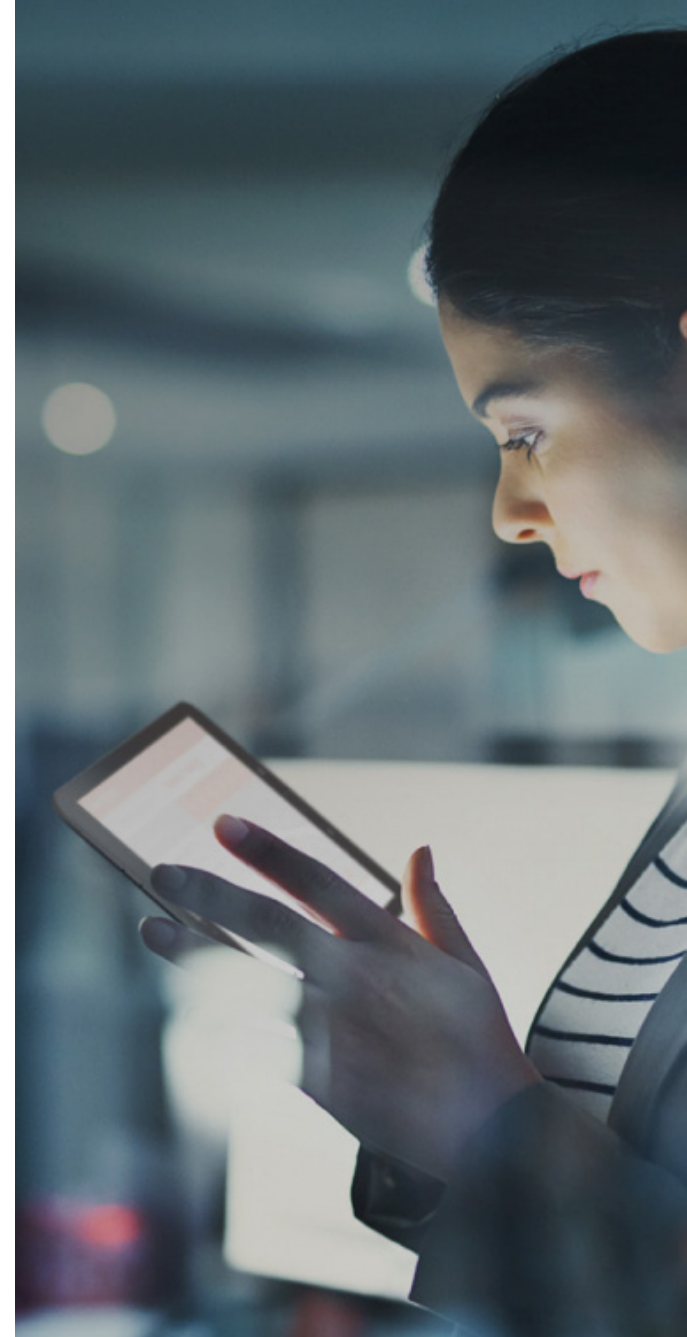

- Send push notifications with customized messages, and make them periodic, dismissable, or non-dismissable based on severity
- Various lockdown options for both pre-paid and post-paid models
- Supports SIM/connectivity-based lock, total lock, and more flexible lock/unlock options
- Remotely wipe missing or stolen devices

Streamlined experience

Knox Guard is easy to use with web console access or as a platform with a comprehensive set of APIs.

- Access the browser-based console to manage devices, with no development required
- Optional server integration with your legacy systems (supported using REST APIs)
- Customized EULA for end user consent, update lock screen message without changing device status, install a corporate application to be easily accessed on lock screen
- Knox Guard is compatible with other Enterprise mobility solutions like EMM
