

Device provisioning with cloud license

Cloud Device Provisioning of Galaxy S9 Tactical Edition

Step One

Connect the Samsung Galaxy S9 Enterprise Edition to a Windows laptop.
*(Direct or via USB hub up to 8 ports)

Step Two

Flash the device binary using the included Samsung Galaxy S9 Tactical Edition ROM DVD.

Step Three

Connect the Galaxy S9 Tactical Edition to the Internet.

Step Four (Optional)

Visit samsungknox.com to create a Knox Account.

Step Five (Optional)

Register for E-FOTA and Knox Configure.

Connect the EUD to your MDM of choice to:

- Activate ROM and Knox licenses by entering your Custom + Knox Platform for Enterprise (KPE) key in your MDM
-
- Implement policies
-
- Apply a STIG

Load applications directly to the EUD.

If mission requirements demand:

- TAK
-
- KILSWITCH
-
- GPS, mapping and other tactical applications

Connect EUD to tactical kit.

- Ruggedized case solutions
-
- Connect to tactical hub or directly to tactical radios
-
- Install tactical kit management applications

The Galaxy S9 Tactical Edition is now operationally ready.
