Will It Fit Guide

Be sure your new fridge will fit

1. Measure height including flooring. Be sure to allow for hinge clearance height if needed.
2. Measure width including countertop overhang.
3. Measure depth including molding or trim.

Standard Depth Refrigerator

Installation clearances
- Allow 3.75" of clearance when installing along a wall. This will allow for the door to open 90 degrees without the handle contacting the wall.
- Allow 2" minimum clearance at rear for proper air circulation and water/electrical connections.
- Allow a 3/8" minimum clearance at sides and top for ease of installation.
- For optimal usage and ability to open refrigerator doors completely, do not install next to a wall.

Please note: The above dimension and cutout information is for planning purposes only. For complete installation details, consult manual packed with product or download manual online at samsung.com.

Walk the delivery route
- Identify the narrowest opening that the appliance will travel, from outside the home to the location where it will be installed.
- Appliance depth or width must be smaller than the width of the narrowest opening.

Energy Guide

Refrigerator
User manual

User Manual
Bespoke Panel Installation Guide

Installation Instruction

1. Before starting the installation, ensure the refrigerator is unplugged to prevent any electrical hazards.
2. Identify the type of panel you are installing (top, middle, or bottom).
3. Read the instructions provided with the panel to ensure compatibility with your refrigerator model.
4. Place the panel in the designated groove along the top of the bottom door.
5. Ensure there is no gap between the panel and the door and the retaining clips are fully inserted to prevent the panel from falling off due to external forces.
6. After inserting the panel properly, make sure it is firmly secured by pressing its edges tightly.
7. Repeat steps 4 to 6 for the top panel, placing it into the groove along the bottom of the top door and pressing the edges in to secure it as shown in figure 2.3.
8. Make sure that there is no gap between the panel and the door. Once the panel is securely installed, insert the retaining clips as shown in figure 1.5.
9. Ensure that all panels are properly aligned and secured to maintain the aesthetic and functional integrity of your refrigerator.

Attention CFR
- It is recommended to use a chair or ladder when working on a higher portion of the product. It is also recommended to use gloves without ornaments such as rings.
- Wear gloves without ornaments such as rings before working on the installation.
- It is recommended to handle the product by two or more persons.
- Use a chair or a ladder when working on higher parts of the product. Take care of the edges of the product and make sure the work area is tidy.

Attention MES
- If the clips are not completely inserted or there is a gap between the panel and the door, the panel may fall due to external impacts.
- Ensure the clips are inserted correctly.
- Place the panel central or bottom in the groove along the top of the bottom door and press the edges of the panel around the frame and after fixing it insert the retaining clips as shown in figure 1.5.
- Place the top panel in the groove along the bottom of the top door and press the edges of the panel in to secure it as shown in figure 2.3. Make sure that there is no gap between the panel and the door.
- After inserting the panel properly, make sure it is firmly secured by pressing its edges tightly.
- If the clips are not completely inserted or there is a gap between the panel and the door, the panel may fall due to external impacts.
- Ensure the clips are inserted correctly.
- Place the panel central or bottom in the groove along the top of the bottom door and press the edges of the panel around the frame and after fixing it insert the retaining clips as shown in figure 1.5.
- Place the top panel in the groove along the bottom of the top door and press the edges of the panel in to secure it as shown in figure 2.3. Make sure that there is no gap between the panel and the door.
- After inserting the panel properly, make sure it is firmly secured by pressing its edges tightly.
